

LUGISANI JEREMIAH MAHLATSI

061 114 8128 | Jmahlatsi25@gmail.com | devmahlatsi.vercel.app | github.com/DevMahlatsi | Pretoria, Gauteng

Junior Software Developer | Computer Science Graduate

PROFESSIONAL SUMMARY

Computer Science graduate (Diploma, Tshwane University of Technology, 2024–2026, 79.22% average) with a strong core in Java — Object-Oriented Programming, Data Structures & Algorithms, server-side development, EJBs, and JSPs — alongside hands-on experience developing, testing, and deploying full-stack and frontend web and mobile applications with JavaScript/TypeScript, Python, Node.js, and Django. Led a cross-functional team to deliver an AI-powered agri-tech platform end to end, from database design through deployment. Demonstrates strong problem-solving ability, clean code practices, and the capacity to deliver production-ready software in agile environments.

TECHNICAL SKILLS

Java & Enterprise Development: Object-Oriented Programming (classes, inheritance, polymorphism), Data Structures & Algorithms, multithreading basics, file handling, server-side development, EJBs (Enterprise JavaBeans), JSPs (JavaServer Pages), Servlets

Languages: Java, JavaScript (ES6+), TypeScript, Python, HTML, CSS, SQL

Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, React Native (Expo), Django REST Framework, Tailwind CSS

Databases & Cloud: SQL, PostgreSQL (Supabase), AWS S3

APIs & AI: REST API design, JWT Authentication, Google Gemini AI, OpenWeatherMap API

Tools & Platforms: Git, GitHub, Vercel, Render, VS Code

Concepts & Practices: Agile/Iterative Development, Responsive Design, Debugging, Unit Testing & Validation, Component-Based Architecture, Team Leadership

EDUCATION

Diploma in Computer Science

2024 – 2026

Tshwane University of Technology (TUT), Pretoria, Gauteng

Academic Average: 79.22%

Relevant Coursework: Java (Object-Oriented Programming, Data Structures & Algorithms), Server-Side Development, Enterprise JavaBeans (EJBs), JavaServer Pages (JSPs) & Servlets

WORK EXPERIENCE

Computer Laboratory Mentor | Tshwane University of Technology

Mar 2025 – Dec 2025

- Supported students during practical laboratory sessions in computer literacy, software usage, and programming assignments.
- Provided one-on-one guidance to students on programming concepts and technical problem-solving.
- Monitored and reported on student progress during structured study sessions (Studythons).
- Maintained an organised, productive lab environment and directed students to appropriate academic resources.
- Developed communication and technical mentoring skills by translating complex IT concepts into accessible language.

PROJECTS

AgriSmart — AI-Powered Agri-Tech Platform (Featured) | github.com/DevMahlatsi/agrismart

Mobile & backend platform connecting South African small-scale farmers directly with consumers, featuring AI plant disease detection and farm discovery. Full Stack Developer & Team Lead, 5 months, ongoing.

- Led full-stack architecture design and implementation across a cross-functional team.
- Built a Django REST API with 25+ endpoints covering farms, crops, marketplace, and orders.
- Integrated Google Gemini AI for plant disease detection, achieving 85%+ accuracy.
- Developed an interactive farm discovery map using Expo and react-native-maps with geolocation search/filtering.
- Implemented real-time weather data via the OpenWeatherMap API and farm analytics.
- Built a marketplace with product listings, shopping cart, checkout, and order status tracking.
- Implemented multi-role JWT authentication (farmer / consumer / superuser).
- Managed a Supabase PostgreSQL database (15+ tables) with migrations and seed data, plus AWS S3 image storage.

- Deployed the backend to Render and coordinated frontend integration with the team.
- Authored 60%+ of core backend logic and API documentation.

Tech stack: React Native (Expo), Django REST Framework, PostgreSQL (Supabase), Google Gemini AI, OpenWeatherMap API, AWS S3, JWT Authentication, JavaScript.

Developer Portfolio Website | [devmahlatsi.vercel.app](#)

Full-stack personal portfolio application built to showcase projects, skills, and services.

- Architected and deployed a multi-section web application (Home, About, Portfolio, Contact) using Next.js with server-side rendering and dynamic routing.
- Implemented modular, reusable component architecture with JavaScript state management and dynamic data rendering.
- Applied responsive UI/UX design principles using Tailwind CSS, ensuring cross-device compatibility.
- Deployed and managed a live production environment on Vercel with continuous deployment via GitHub.

Tech stack: JavaScript, TypeScript, Next.js, Tailwind CSS, Git/GitHub, Vercel.

Kokoro Stream — Streaming Platform UI | [kokoro-stream.vercel.app](#)

Frontend web application simulating a full-featured video streaming platform interface.

- Designed and implemented an interactive, component-based UI for browsing and viewing media content.
- Built client-side routing for dynamic page navigation across multiple views.
- Developed reusable, typed UI components (movie/TV cards) using TypeScript for improved code reliability.
- Applied responsive layout design for seamless mobile and desktop experiences.

Tech stack: TypeScript, JavaScript, Tailwind CSS, Vercel.

Merch Bay — E-Commerce Web Application | [merchbay.vercel.app](#)

Full-stack e-commerce application enabling product browsing and purchasing functionality.

- Built a dynamic product catalogue with JavaScript-driven rendering (arrays, objects, conditional logic).
- Implemented full shopping cart functionality including add/remove items and real-time state management.
- Applied CRUD principles to handle product data lifecycle across the application.
- Delivered a clean, responsive user interface optimised for multiple screen sizes.

Tech stack: JavaScript, Next.js, Tailwind CSS, Vercel.

KEY STRENGTHS

- **Leadership:** Led a cross-functional team as Full Stack Developer & Team Lead on a live, deployed AI product.
- **Problem Solving:** Systematic approach to debugging and resolving logical/runtime errors in complex codebases.
- **Adaptability:** Comfortable working across the full stack — from database and API design to mobile and responsive UI.
- **Communication:** Demonstrated ability to explain technical concepts clearly through academic mentoring.
- **Self-Driven Learning:** Independently built and deployed four live production applications while completing full-time studies.
